Summing-up

Summing-up - My List of Materials and Manufacturers

- ❑ **BuildSystem Web has a large database of materials, manufacturers, vendors and catalogues based on MasterFormat coding system.**
- ❑ **MasterFormat is an international coding system for construction materials.**
- ❑ **ASTM Standard E2129-10 is organized according to MasterFormat to promote consistency in evaluation of building products.**
- ❑ **Users can prepare a My List of materials with rates.**
- ❑ **Users can send requests to IPMG for listing new materials and manufacturers.**

Summing-up - My List of Materials and Manufacturers

- ❑ **Users can send enquiries to manufacturers / vendors for quotation on their material quantities.**
- ❑ **The My List of materials can be exported to excel for further use.**
- ❑ **The My List on BuildSystem web is confidential.**

The Alternative to *MasterFormat*?

Without *MasterFormat*, construction would **collapse** under information overload and you wouldn't be able to find anything!

Thank You !
